

Knifemaking With Bob Loveless

Build Knives With a Living Legend

For aficionados of knifemaking and collecting, the late Bob Loveless needs no introduction. Readers will revel in color photos from inside the Loveless' knife shop, and of his knives, as author Durwood Hollis details Loveless' stock-removal method of knifemaking, tools of the trade, designs, heat treating and tempering of blade steel, handles, sheaths, knife care and maintenance, and tips for the field.

For this project, Loveless generously allowed the author unprecedented access to his workshop and his life, revealing his methods for creating a knife, including tempering and design, the materials and tools he used, and his recommendations for the care of your knife.
